

12th- COMPUTER APPLICATIONS STUDY MATERIAL

KRISHNAGIRI DISTRICT 2023-2024.

CHIEF

Mrs. K.P. MAGESHWARI, CHIEF EDUCATIONAL OFFICER, KRISHNAGIRI DT

COORDINATORS

Dr. M. VENKATESAN, PA to CEO (HSS) KRISHNAGIRI DT.
Mr, S. VADIVELU, APO,CEO OFFICE ,KRISHNAGIRI.
Dr. B.J. MURALI, HEADMASTER, G.H.S. SCHOOL, BARUR.
Mr.S.JOHN PACKIAM, AHM,MMS,RAJU ST,KRISHNAGIRI.

COMPUTER APPLICATIONS- SUBJECT COORDINATOR

Dr. B.J. MURALI, HEADMASTER, GHSS, BARUR

SUBJECT TEACHERS

Mr. P. MUTHUKUMAR P.G. ASST. GGHSS, POCHAMPALLI

Mrs. K.P. KANAGAVALLI P.G. ASST. GHSS, VELAMPATTI

Mrs. G. THENGOTHAI P.G. ASST. GBHSS, VEPPANAPALLI

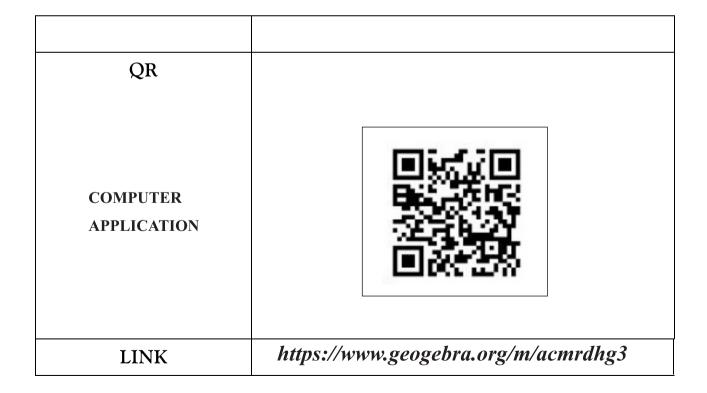

Mrs. K. ARULSELVI P.G. ASST. GBHSS, THOGARAPALLI

Mrs. R. RAJESWARI P.G. ASST. GGHSS, KUNTHARAPALLI

12-ம் வகுப்பு தமிழ் பாடப்புத்தகத்தில் உள்ள ஒரு மதிப்பெண் வினாக்கள், GeoGebra மென்பொருளின் உதவியோடு, ஒரு வினாவிற்கு சரியான விடையை தேர்வு செய்ய அதிகபட்சம் மூன்று வாய்ப்புகள் வழங்கி, மாணவர்களின் கற்றல், கற்பித்தல் திறன் அதிகரிக்கும் வகையில் வடிவமைக்கப்பட்டுள்ளது என்பதை தெரிவித்துக்கொள்கிறோம்.

குறிப்பு :-

Hi-Tech Lab- QR Code- ஐ செய்து அல்லது Link- Click செய்து மாணவர்கள் பயிற்சி செய்யும் விதமாக மென்பொருள் உருவாக்கப்பட்டுள்ளது.

ONE MARKS QUESTIONS:

LESSON 1-MULTIMEDIA

2.	a) a type of computer hardware b) a type of comp				
2.		uter software			
2.	c) a type of computer network				
2.	d) the use of multiple forms of media to communicate inf	ormation			
	2. What is a raster image?				
	a) a type of Image made up of pixels b) a type of image				
	c) a type of image made up of text d) a type of image				
3.	3 Has five major components like text, images, sour				
		d)multi-word			
4.	4. Which of the following is a raster image file format?				
_	a) <u>JPEG</u> b)EPS c)CDR d)SVG				
5.	5. What is vector image?				
	a)a type of Image made of pixels b) a type of image				
	c) a type of image made up of text d) a type of image	made up of sound waves			
6.	6. Which of the following is an audio file format				
٥.	a) <u>MP3</u> b) AVI c) MPEG d) PN	NG			
7.	7. Which of the following is a vector image file format?				
•	a) PSD b)JPEG c)EPS d)BN	ЛP			
8.	8. AIFF file format was developed by	•••			
•	a) TCS b) microsoft c)Apple inc. d)	IBM			
9.	9. RTF (Rich text format) file format was introduced by	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,			
	a)TCS b)microsoft c)Apple inc. d)ibm	<u> </u>			
10.	10. The expansion of JPEG is				
	a)joint photographic Experts group b)joint photo Expe	rts group			
	c)joint photon Experts group d)joint photograph				
		c., p. c.c. 8. c.a.b			
		c.,p. 555 g . 5 4.p

TT. W	at is the index of t				_	with 5 eie	ments?
	a) 2 b) 3	c) 4	d) 5			

LESSON 6 – CONDITIONAL STATEMENTS IN PYTHON

1. Wha	at is the simplest	conditional st	atement in PH	IP?				
	a) if-else statement							
	b) if statement							
	c) switch statement							
	d) if-elseif-else statement							
2. Whi	ch of the followi	ng is NOT a typ	e of condition	nal statement in PH	IP?			
	a) if	b) if else	C	c) if elseif else	d) while			
3. What type of statement is the ifelse statement?								
	a) Conditional s	tatement						
	b) Looping							
	c) Input statement							
	d) Output state	ment						
4. Whi	ch of the followi	ng is used to sp	pecify multiple	e conditions in a sw	itch statement?			
	a) AND	b) OR	c) case	d) if				
5. Wha	at is the syntax fo	or an if-else sta	tement in PHI	P?				
	a) if(condition)	{	}					
	b) if(condition)	{ //True-block	;	se-block; }				
	c) if-else(condit	ion) {	lock;	False-block; }				
	d) if-elseif(cond	ition) { //True-	block; } else { ,	//False-block; }				
6.Whic	ch of the followin	g is used to te	rminate the sv	witch statement?				
	a) return	b) continue	c)	goto	d) break			
7. How	does the if state	ement work in	•		•			
	a) A block of co	de is executed	if a certain co	ondition is true.				
	b) A block of co							
	•			iditions are true.				
	•		•	nditions are false.				
8. Whi				e conditions in an i	f elseif else			
	statement?	g is used to sp	,					
	a) AND	b) OR	c) ca	a (h	elseif			
9. Wha	•	•	•	•	switch statement?			
				b) The program				
	c) The nearest of				e block is executed			
10 W/h	nat happens if th			•	e block is executed			
10. 111	a) The code ins							
	b) The code insi	-						
	c) The program	· ·	aces is skipped	u.				
	d) None of the

,	a) 1 2 3 4 5	b) 5 4 3 2 1		c) 1 1 1 1	l 1	d) None of	the above
7. Wha	t are the three parts of	the for loop syn	tax in P	HP?			
	a) initialization, condit	ion, increment					
	b) initialization, code b	lock, condition					
	c) code block, condition	n, increment					
	d) condition, initializati	on, code block					
8. Whic	ch looping structure sho	uld be used to i	terate c	ver eleme	ents of	an array in F	P?
	a) for loop b) whil	e loop c) do	while lo	ор (d) fore	ach loop	
9. Wha	t is the syntax for for lo	op in PHP?					
	a) for(initialization; co	ndition; increme	ent) {	code}			
	b) foreach(initialization	; condition; dec	rement)	{ // code}			
	c) while(condition)						
	d) do{}while(conditio	n)					
10. Wh	at type of loop is "do	while loop" in P	HP?				
	a) Entry-Check Loop	b) Exit-Check L	. oop c) Counter L	.oop	d) Iteration l	-oop
		LESSON 8-	FORMS	AND FILE	ES		
1. Wha	t form control allows th	e user to select	multipl	e values?			
	a) text inputs	b) buttons	c) che	ckboxes	d) rad	dio buttons	
2. Whic	ch of the following is NO	OT a form contro	ol availa	ble in HTN	/IL forr	ns?	
	a) Text inputs	b) Buttons	c) Che	ckboxes	d) Cr	opping Tool	
3. Wha	t are HTML forms used	for?					
	a) To collect input from	n users b) To c	reate se	rver-side p	progra	mming langu	ıage
	c) To create a database	d) To s	end em	ails			
a 100						2	
4. Wha	t form control allows th		-				
F \4/1-	a) text inputs	b) buttons	c) che	ckboxes	a) rad	lio buttons	
5. wna	t is the purpose of valid			- • •	la a -19		
	a) To check the input d	iata submitted b	οy τne u	ser trom ti	ле спе	nτ machine	

b) To display data to usersc) To store data on the serverd) To send data to the client

6. What PHP function	n can be used to read	a file?		
a) fopen()	b) fread()	c) fclc	se() d) fwrite()
7. Which tag is used	to create an HTML for	m?		
a) form	b) i	nput	c) textare	a d) select
8.What PHP function	can be used to close	a file?		
a) fopen()	b) fread()	c) fclc	se() d) fwrite()
9. Which PHP function	n can be used to oper	n a file?		
a) fopen()	b) fread()	c) fclc	se() d) fwrite()
10. How many types	of validation are avail	lable in PH	P?	
a) One	b) Two		c) Three	d) Four
	LESSON 9 – COI	NNECTING	PHP AND	MYSQL
1. How many parame	eter are required for N	/IYSOLi con	nect function	on in PHP ?
a) 2) 4	d) 5	
•	ct function to execute	•	•	P?
	ery("Connection Obje			
	nnection Object","SQL		,,	
	ry("Connection Object		erv")	
	ery("SQL Query")	, , , , ,	, ,	
	eter are required for N	/IYSOLi aue	ery function	in PHP ?
a) 2		:) 4	d) 5	
	ct function Closing Co	•	-	
	se("Connection Object			onnection Object");
	e("Connection Object			ose("Database Object");
–	correct MySQL Functi			,,,
	nnect() Function			ose() Function
	ect_data() Function			fected_rows() Function
	ct function to establis			_
a) mysgli co	nnect("Server Name "	,"User Nan	ne","Passw	ord","DB Name");
	Server Name ","User N			
	nect("Server Name ","			
	nnect ("Database Obje			
	HP supports MySQLi			
a) Version 2.0	b) Version 3.0	c) Ver	sion 4.0	d) Version 5.0
8. How many parame	eter are required for N	/IYSQLi Clo	se function	in PHP ?
a) 1	b) 2 c)	3	d) 5	
Li	ESSON 10-INTRODU	ICTION TO	COMPUT	ER NETWORKS
1. In mobile network	, land areas for netwo	rk coverag	e was distri	buted as
a) Firmware	b) cells c) Range	d) Service
	in an online forum lea	ds to perso	onal attacks	and is called
a) Hackers	b) Virus	c) Onlin	e war 💢	d) Flame war
3. Which among then	m was challenging to t	he busines		computer networking
a) Hacking	b) Viruses	c) Both	a & b c	l) none of this above
4. Which one of the f	following are harmful	to comput	er?	
a) Bloggers	b) Browser	c) Hack	ers d) t	twitter
5. Which one of the f	following is not the so	cial media		
a) Gmail	b) Facebook	c) twitt	er d) L	inkedin

6.	Wi-Fi	is	short	name	for
----	-------	----	-------	------	-----

a) Wireless Fidelity b) Wired fidelity c) Wired fiber optic d) Wireless fiber optic

7. A set of computers connecting together is called as ------

t of computers co	inecting togethe	ir is called as	
a) Network	b) Server	c) Hub	d) Node

LESSON 11 – NETWORK EXAMPLES AND PROTOCOLS

1	provides e-n	nail service				
	a) DNS	b) TCP	c) FTP	d) SMTP		
2. Wi-I	Fi stands for					
	a) Wireless Fide	elity b) wired	d fidelity c) w	ired optic fibre	d) wireless optic fibre	
3. Mat	ch the following	and choose the	e correct answe	r		
	i. HTTP -The cor	e protocol of t	he World Wide \	Web.		
	ii. FTP- enables a client to send and receive complete files from a server.					
	iii. SMTP - Provi	de e-mail servi	ces.			
	iv. DNS- Refer to	o other host co	mputers by usir	ig names rather	than numbers.	
	a) i, ii, iii, iv	b) ii, iii, iv, I	c) iii,	iv, i, ii	d) iv, iii, ii, I	
4. Whi	ch of the followir	ng system secu	rely share busir	ness's information	on with suppliers,	
	vendors, partne	ers and custom	iers.			
	a) Extranet	b) Intranet	c) arpaı	net	d) arcnet	
5. It gu	iarantees the sen	iding of data is	successful and	which checks er	ror on operation	
	at OSI layer is					
	a) Application la	ayer b) Netv	vork layer c) T ı	ransport Layer	d) Physical layer	
6. Com	nmunication over	·i	is be made up o	f voice, data, im	ages and text	
	messages.					
	a)Social media	b) mo	bile network	c) whatsapp	d) software	
7. RFIC	stands for					
	a) Radio Free id	entification	b) rea	al Frequency ide	ntity	
	c) Radio Frequ	ency indicators	d) Rad	dio Frequency Io	lentification.	
8. A TC	CP/IP network wit	th access restr	icted to membe	rs of an organiz	ation	
	a) LAN	b) MAN	c) WAN	d) Intranet		
9. Whi	ch one of the foll	lowing will sec	ure data on trar	nsmissions		
	a) HTTPS	b) HTTP	c) FTP	d) SMTP		
10	Refers to the oth	er host compu	ters by using na	mes rather thar	numbers	
	a) DNS	b) TCP	c) FTP	d) SMTP		

LESSON 12-(DNS)DOMAIN NAME SYSTEM

1. Expansion of	f URL is
-----------------	----------

a) Binary

- a) Uniform Resource Location b) Universal Resource Location c) Uniform Resource Locator d) Universal Resource Locator
- 2. Which of the following notation is used to denote IPv4 addresses?

b) Dotted-decimal

- 3. Which of the following initiates the mapping of domain name to IP address?

 a) Zone b) Domain c) Resolver d) Name servers
- 4. Which of the following is used to maintain all the directories of domain names?
- a) Domain name system b) Domain name space c) Name space d) IP address

c) Hexadecimal

d) a and b

5. How many types are a	available in URL?	•				
a) 2 b) 3		c) 4	d) 5			
6. How many bits are us		•	,			
a) 32	b) 64	c) 128		d) 16		
7.Root Name servers are	·	•		,		
a) IANA	b) ICANN		c) Wł	HOIS d)	DNS	
8. Maximum characters			-	.0.0 4,	2110	
a) 255	b) 128		c) 63	d) 3	12	
9. In the domain name,	•		-	•	,_	
a) semicolon (;)	b) dot (.)	-	colon (:)		NULL	
10. Which is the contigu		•	, ,	•	1011	
a) Zone	b) Domain		Resolver) Name sen	Vers
d) Zone	b) bomain	c,	INC301VC1	u	, ivallie ser	VCIS
	LESSON	13-NETW	ORK CAB	LING		
1. Which of the followin		heral devic	e with a si	m slot to co	nnect the	
computers to In						
a) USB b) 2. ARPANET stands for	Dongles	c) Memory (card	d)	Mobiles	
	aanah Duaisat Aa	· NI - 4. · · -	al.			
a) American Rese			K			
b) Advanced Res			- ula			
c) Advanced Res	_	-				
d) American Res	earch Programs A	and Networ	K			
3. Expansion of UTP is	l Toulaka d Dain	I= \ 1.1		T	Ductocal	
a) Uninterrupted				ted Twisted		
c) Unshielded Tv		*		visted Proto	COI	
4.Which wiring standard						-11. 10. 10. 10. 10.
a) straight Throu		o) Cross Ove	_		wiring	d) None
5. Which medium is used	=					
a) Microwave	b)infrare	a	c)light	c a	sound	
6. WWW was invented by	-	5.11	\ D.L. :		13.1	
a) Tim Berners L		_	c) Blais	se Pascal	a) Jo	hn Napier
7. Which connector is us		et cables?	\ D.164			
a) RJ11	b) RJ21		c) RJ61	_	d) RJ	145
8. Which cable is used in			١.٥			Nuco II
a) UTP cable	b) Fibre o	•	•	xial cable		d)USB cable
9. Which of the followin	_	alled as char	-			
a) RJ11	b) RJ21		c) RJ6	1	d) RJ	45
10.How many pins are u						
a)8	b)6	c)50		d)25		
	LESSON 14	-OPEN SO	URCE CO	NCEPTS		
1. Open NMS was releas						
a) 1999	b) 2000	c) 20	03	d) 2004		
2. Which is an example of			. 7	4) C++		
a) simulator 3. Which of the followin	b) TCL	c) Ns ce network i		d) C++ g software?		
a) C++	b) OPNET		oen NMS	d) OMNet		
4. Which of the followin						tion
and are used for	examination?					
a) Net Exam	b) Network hard	lware c) Tr	ace file	d) Net doo	ument	

5. Which of the following is not a network sim a) Ns2 b) OPNET	ulation software? c) SSFNet d) C++					
6. which of the following is a software program	n that replicates the functioning of a					
computer network?						
a) Network software	b) Network simulation					
c) Network testing d) Network calculator						
7. If the source code of a software is freely acc	essible by the public, then it is known as					
a) freeware b) Firmware	c) Open source d) Public source					
8. Choose the Correct Pair from the following	to build NS2					
a) UNIX & TCL b) UNIX & a. C-	++ c) C++ & OTcl d) C++ & NS2					
LESSON 15-E-COMMERCE						
1. SME stands for						
a) Small and medium sized enterprises	s b) Simple and medium enterprises					
c) Sound messaging enterprises	d) Short messaging enterprises					
2. A company involved in E-Business if	a,					
a) it has many branches across the wor	ld.					
b) it conduct business electronically or						
c) it sells commodities to a foreign cou						
d) it has many employees.						
3. Which of the following is not a tangible goo	d?					
a) Mobile Phone b) Mobile App						
4. Out-sourcing means	a) meanine a) nower souquet					
a) Work outsourced to a branch of its o	own company					
b) Work outsourced to new employees						
c) Work outsourced to a third party loc						
d) Work outsourced to a third party or						
5. Assertion (A): The websites of first wave do						
Reason (R): The dotcom companies of first						
a) Both (A) and (R) are correct and (R)						
b) Both (A) and (R) are correct, but (R)	• • • • • • • • • • • • • • • • • • • •					
c) (A) is true and (R) is false	,					
d) (A) is false and (R) is true						
5, (· · , · · · · · · · · · · · · · · · ·						
6. Which of the following is not correctly mate	hed					
a) The First Wave of Electronic Comme	erce: 1985 -1990					
b) The Second Wave of Electronic Com	merce: 2004 – 2009					
c) The Third Wave of Electronic Comme	erce: 2010 – Present					
d) Dotcom burst: 2000 – 2002						
7. The dotcom phenomenon deals with						
a) Textile industries	b) Mobile phone companies					
c) Internet based companies	d) All the above					
8. G2G systems are classified into						
a) Internal facing and External facing	b) Internet and Extranet					
c) First wave and Second wave	d) Left facing and Right facing					

9. Which of the following is a characteristics of E-Commerce

- a) Products can be inspected physically before purchase.
- b) Goods are delivered instantly.
- c) Resource focus supply side
- d) Scope of business is global.
- 10. ____ host the e-books on their websites.
 - a) Bulk-buying websites
- b) Community websites
- c) Digital publishing websites
- d) Licensing websites

LESSON 16-ELECTRONIC PAYMENT SYSTEM

- 1. Which of the following is true about Virtual payment address (VPA)
 - a) Customers can use their e-mail id as VPA
- b) VPA does not includes numbers

- c) VPA is a unique ID
- d) Multiple bank accounts cannot have single VPA
- 2. Based on the monetary value e payment system can be classified into
 - a) Mirco and Macro
- b) Micro and Nano
- c) Maximum and Minimum
- d) Maximum and Macro
- 3. Assertion (A): Macro electronic payment systems support higher value payments.

Reason (R): Expensive cryptographic operations are included in macro payments

- a) Both (A) and (R) are correct and (R) is the correct explanation of (A)
- b) Both (A) and (R) are correct, but (R) is not the correct explanation of (A)
- c) (A) is true and (R) is false
- d) (A) is false and (R) is true
- 4. _____ refers to a payment made from one bank account to another bank account using eletronic methods.
 - a) Electronic payment
- b) Direct payment

c) Indirect payment

d) None of the above

- 5. ECS stands for
 - a) Electronic Clearing Services
- b) Electronic Cloning Services
- c) Electronic Clearing Station
- d) Electronic Cloning Station
- 6. Which of the following is a online payment system for small payments.

List B

- a) Card based payment
- b) Micro electronic payment
- c) Macro electronic payment
- d) Credit card payment
- 7. Pick the odd one in the credit card transaction
 - a) card holder b) merchant
- c) marketing manager d) acquirer
- 8. Match the following

List A

A1) First Digit B1) Account number

A2) 9th to 15th Digit

B2) MII Code

A3) First 6 Digits

B3) BIN Code

A4) Last Digit

B4) Check digit

A1 A2 A3 A4 a) B4 B3 B2 B1

b) B2 B1 B3 B4

c) B2 B3 B4 B1

d) B2 B4 B3 B1

9. Which of the following is true about debit card		
i. debit cards cannot be used in ATMs		
ii. debit cards cannot be used in online transactions		
iii. debit cards do not need bank accounts		
iv. debit cards and credit cards are identical in physical properties		
a) i, ii, iii b) ii, iii, iv c) iii alone d) iv alone		
10. Which of the following is correctly matched		
a) Credit Cards - pay before b) Debit Cards - pay now		
c) Stored Value Card - pay later d) Smart card – pay anytime		
LESSON 17 – ECOMMERCE SECURITY SYSTEM		
1 Assessment is a second to the second decomposition and decomposition		
1. Asymmetric encryption use keys for encryption and decryption		
a) Same b) Different c) Positive d) Negative		
2. In E-Commerce, when a stolen credit card is used to make a purchase it is termed as		
a) Friendly fraud b) Clean fraud c) Triangulation fraud d) Cyber squatting		
3. The websites secured by Secure Socket Layer protocols can be identified using		
a) html:// b) http:// c) htmls:// d) https://		
4 protocol is used for securing credit cards transactions via the Internet		
a) Secure Electronic Transaction (SET) b) Credit Card Verification		
c) Symmetric Key Encryption d) Public Key Encryption		
5. The security authentication technology includeS		
i) Digital Signatures ii) Digital Currency iii) Digital Image iv) Digital Certificates		
a) i & iv b) ii & iii c) i, ii & iii d) all the above		
6. PGP stands for		
a) Pretty Good Privacy b) Pretty Good Person		
c) Private Good Privacy d) Private Good Person		
7. Which of the following is not a security element involved in E-Commerce?		
a) Authenticity b) Confidentiality c) Fishing d) Privacy		
8. Which of the following is true about Ransomware		
a) Ransomware is not a subset of malware b) Ransomware deletes the file instantly		
c) Typopiracy is a form of ransomware d) Hackers demand ransom from the victim		
9. Secure Electronic Transaction (SET) was developed in		
a) 1999 b) 1996 c) 1969 d) 1997		
10 is the process of converting plain text into meaningless cipher text		
a) Encryption b) Decryption c) Digital certificate d) Digital signature		
LESSON 18-ELECTRONIC DATA INTERCHANGE		
1. EDI stands for		
a) Electronic Details Information b) Electronic Data Information		
c) Electronic Data Interchange d) Electronic Details Interchange		
2. Which is the first industry-specific EDI standard?		
a) TDCC b) VISA c) Master d) ANSI		

3. Who is called as the father of EDI?

a) Charles Babbage b) Ed Guilbert c) Pascal d) None of the above

4.. Which of the following is an internationally recognized standard format for EDI?

a) TSLFACT b) SETFACT c) FTPFACT d) EDIFACT

5. Which of the following is a type of EDI?

a) Direct EDI b) Indirect EDI c) Collective EDI d) Unique EDI

TWO MARKS QUESTION

1. Define Multimedia?

Multimedia allows the users to combine and change data from various sources like image, text, graphics, audio, and video to a single platform.

2. List out multimedia components

Multimedia has five major components like

- Text
- Images
- Sound
- Video and
- Animation

3. Define Animation

Animation is the process displaying still images so quickly so that they give the impression of continuous movement.

4. List out video file formats with expansion

AVI - Audio/Video Interleave

MPEG - Moving Picture Experts Group

5. Classify the TEXT component in multimedia

- Static text
- Dynamic text (or) Hyper text

6. Classify the IMAGE component in multimedia

- Raster (or) Bitmap images
- Vector Images

7. What is desktop publishing?

Desktop publishing is the creation of page layouts for documents using DTP software.

8. What is a pasteboard in page maker?

- The area outside of the dark border is referred to as the pasteboard.
- Pasteboard is used to temporarily hold elements while designing a document.

9. What is Text editing?

Text editing means making changes to the existing text.

10. What is threading text blocks?

Text blocks that are connected in this way are threaded. The process of connecting text among Text blocks is called threading text.

11. What are the ACID properties?

Atomicity ,Consistency,Isolation.Durability

12. What is primary key?

A primary key is a key that uniquely identifies a record in a table.

13. Define Data Model and list the types of data model used .

A data model that determines the logical structure of a database.

Types of Data Model:

- Hierarchical Database Model
- Network Model
- Relational Model
- Object Oriented Model

14. What is Relationship and List its types?

In Entity Relationship Model, relationship exists between two entities.

Three types of relationship are,

- One to One relationship
- One to Many relationship
- Many to Many relationship

15. State few advantages of Relational databases.

The features of RDBMS are

- High availability
- High Performance
- Robust Transactions and support
- Ease of management
- Less cost

16. Write the Difference between SQL and MYSQL.

SQL	MY SQL
Structured Query Language is not a	MYSQL is a database management
database	system
Used to access the database	Allows managing Relational Database

17. What is PHP?

- PHP stands for Hypertext Preprocessor.
- PHP is a powerful language that is used to create dynamic and interactive web pages.

18. List out any four operators in PHP.

- Arithmetic operators
- Assignment operators
- Comparison operators
- Logical operators

19. What is 'Echo' statement used for? Given an example

The echo statement is used to output a string of text or a variable.

Example: echo 'Hello world';

20. Write about the rules for naming a variable in PHP?

- A variable's name must start with a dollar sign(\$).Ex: \$name
- The variable's name can contain a combination of strings, numbers, and the underscore.

- The first character after the dollar sign must be either a letter or an underscore
- Variables names in PHP are case -sensitive.

21. What is function?

A function is a collection of code that performs a specific task.

22. What are the different types of functions in PHP?

Types of functions in PHP:

- o Built-in functions
- User-defined functions

23. What is an array in PHP and what are its main types?

An array is a special data type. It holds many values under a single variable name.

Types of arrays in PHP:

- Indexed array
- Associative array
- Multi-dimensional array

24. What are the different types of conditional statements in PHP?

Types of Conditional Statements

- If Statement
- If.. else statement
- If.. elseif.. else statement
- Switch statement

25. Write the syntax for an if....else statement in PHP.

```
SYNTAX:

if (condition)

{

// True- block;
}

else

{
```

26. What is the role of the break statement in a switch statement?

The role of the break statement in a switch statement is to terminate the case and exit the switch statement.

// False -block;

27.List out the looping structure in php?

PHP supports four types of loops:

1) For loop

3) While loop

2) For each loop

4) Do-while loop

28. Write the syntax for an "for" loop in PHP.

Syntax

```
for (initialization; condition; increment decrement)
{
      // code to be executed;
}
```

29. Write the syntax for "while "loop in PHP.

Syntax

```
while (condition)
{
    //code to be executed;
}
```

30. What is the output of the following code snippet?

```
<?php
$i =1;
while ($i<=5)
{
    echo $i."<br>";
$i++;
}
```

31.Differentiate Check Box and Radio button

Check Box	Radio Button
Selects more than one value	One value can be chosen at a time

32. What is Validation in PHP?

Validation is a process of checking the input data submitted by the user from client machine.

33. What are the 2 types of validation available in PHP?

The two types of validations are:

- Client Side Validation
- Server- Side Validation

34. What are the MySQLi function available in PHP?

- Mysqli _ connect () Function
- Mysqli close () Function
- Mysqli _ query () Function
- Mysqli_ connect _error () Function

Mysqli_ fetch_ row () Function

35. What is Connection string?

A connection string provides the information that a provider needs to communicate with a particular database.

36. What is a Computer Network?

A set of computers connected together for the purpose of sharing resources is called as computer network.

37. Write short note on internet.

Internet stands for INTER connected NET work.

Internet is simply defined as the connection of individual network operated by academic persons, industry people, government, and private parties.

38. What are the common uses of computer network?

The common uses of computer network are:

- Communication
- Resource Sharing
- Information Sharing

39. What is node in computer network?

A Computer which is connected to a network is called as node.

40. Define Intranet.

Intranet is a private network within an enterprise to share company data and computing resources between the employees. It may consist of many interlinked local are networks.

41. List out the benefits of WiFi.

- It provides mobility
- It provides connection to internet
- Flexibility of LAN.
- Ensures connectivity,
- Low cost, high benefits

42. Expand HTTP, HTTPS, FTP.

HTTP: Hypertext Transfer Protocol

HTTPS: Hyper Text Transfer Protocol Secure

FTP: File Transfer Protocol

43. List any four domain names.

Domain Name	Meaning
Com	Commercial Organisation
Edu	Educational Institutions
Gov	Government (US)
Mil	Military groups

44. What is an URL?

- O URL (uniform Resource Locator) is the address of a document on the Internet.
- URL is made up of four parts-protocols, hostname, folder name and file name.

45. List out four URLs you know.

- https://www.google.com/
- https://www.yahoo.com/
- https://www.rediff.com/
- https://ww.facebook.com/

46. What is a resolver?

The resolver is a program which is responsible for initiating the translation of a domain name into an IP address.

A resolver is stored in the host.

47. Mention the components of DNS.

The important components in the domain Name system are

Name Space, Name server ,Zone, Resolver

48. What are the uses of USB cables?

The universal Serial Bus are used to connect keyboard, mouse and other peripheral devices with the computers.

49. What are the types of twisted pair cables?

There are two types of twisted pair cables,

- Unshielded Twisted Pair (UTP)
- Shielded Twisted Pair (STP)

50. What is Open -Source Software?

Open Source simply refers to making the source code of the software freely available for users or other developers to use and make changes into their projects and build a new one.

51. What is meant by network simulator?

A network simulators is a software program that replicates the functioning of a computer network.

52. What is a trace file?

A signification output of stimulation is the trace files.

Trace files can document every incident that happened in the simulation and are used for examination.

53. What is E-Commerce?

E-Commerce can be described as the process of buying or selling products, services or information via computer networks

54. What is dotcom bubble and dotcom burst?

Dotcom Bubble: The Dotcom bubble was a historic excessive growth of economy that occurred roughly between 1995 and 2000. It was also a period of extreme growth in the usage and adaptation of the internet well.

Dotcom Burst: The Nasdaq-Composite stock market index, fell from 5046.86 to 1114.11. This is infamously. Known as the Dotcom Crash or Dotcom Burst. This began on march 11,2000 and lasted until October 9,2002.

55. Define electronic payment system.

The term electronic payment refers to a payment made from one bank account to another bank account using electronic methods forgoing the direct intervention of bank employees.

56. write about phishing.

Phishing is E-Commerce threat in which a target is contacted by e-mail, telephone or text message by someone who pretend himself as a genuine authority.

57. List the different types of security technologies in E-Commerce.

At present, the security technologies in E-Commerce transaction are roughly classified into:-

- Encryption technology
- Authentication technology
- Authentication protocol

58.Define EDI.

The electronic Data Interchange (EDI)is "Paperless Trade". The exchange of business documents between one trade partner and another electronically.

59. List few types of business document that are transmitted through EDI.

- Delivery notes
- Invoices
- Purchase orders
- Advance ship notice
- Functional acknowledgements

60. Write any two EDI Standards.

The most widely used EDI message standards are the United Nations

EDIFACT

ANSI X12.

Three Marks Qns:

1. List out image file formats

TIFF, BMP, DIB, GIF, JPEG

2. List out video file formats

AVI, MPEG, WMV

- 3. What is PageMaker? Explain its uses.
 - Adobe PageMaker is a page layout software.
 - It is used to design and produce documents that can be printed.

4. What is the use of Master Page?

Any text or object that you place on the master page will appear on the entire document pages to which the master is applied.

Master items cannot be selected on a document page.

5. What is relationship in databases? List its types.

In Entity Relationship Model, relationship exists between two entities.

Three types of relationships are,

- 1. One-to-One relationship
- 2. One-to-Many relationship
- 3. Many-to-Many relationship

6. List out the different types of data types in PHP.

- Integer
- Float
- String
- Boolean
- Array
- Object
- Resource
- NULL

7. What is the syntax for defining a function in PHP?

8. Explain the difference between while loop and do...while loop in PHP.

while loop	dowhile loop
while loop is called as the entry-check loop	dowhile loop is called as the exit-check loop
The while loop is used to execute a block of code while a certain condition is true.	In dowhile loop, the code block is always executed atleast once, even if the condition is false.
The condition is evaluated at the beginning of each iteration of the loop.	The condition is evaluated at the end of each iteration of the loop.

9. Write the Basic HTML Form Controls.

- Text inputs
- Buttons
- Checkbox
- Radio box
- File Select
- Form Tag

10. What are the different file handling tasks that can be performed using PHP?

- PHP Open a File,
- PHP Read a File,
- PHP Close a File,
- PHP Write a File,
- PHP Appending a File
- PHP uploading a File

11. List out some benefits of social networks.

- Group information sharing over long distances.
- Broadcast announcements.
- Fostering diversity of thought

12. Compare Internet, Intranet and Extranet.

Internet	Intranet	Extranet
A global network, public TCP/IP network used by over a million peopleall over the world.		TCP/IP network with restricted access members

13. What are the layers available in TCP/IP reference Model?

- Network Access Layer
- Internet Layer
- Transport Layer
- Application Layer

14. Write a note on URL and its types.

URL (Uniform Resource Locator) is the address of a document on the internet.

The URL is divided into 2 types

Absolute URL

Relative URL

15. Differentiate IPv4 and IPv6.

IPv4	IPv6
IPv4 address is a 32-bit unique address given	IPv6 address is a 128-bit unique address given
to a computer system.	to a computer system
The number of addresses that can be formed in IPv4 is 2 ³²	The number of addresses that can be formed in IPv6 is 2^{128}

16. Write a note on domain name.

- Domain name is the sequence of labels, which are separated by dot (.).
- The root node always represents NULL string.

17. What is meant by null modem cable? Give the examples.

- A cable interconnecting two devices directly is known as a null modem cable.
- The Null modem Cables are the example of the crossover cables.
- The crossover cable is also used for interconnecting two computers without modem.

18. What are the components involved in Ethernet cabling?

- Patch Cable
- RJ45 Connector
- Ethernet Ports
- Crimping Tool

19. List out the Popular Open-Source Software.

NS2, OPEN NMS, Ubuntu, MySQL, PDF Creator, Open Office, 7zip GNUCASH, GIMP, BLENDER, AUDACITY, VLC, MOZILA FIREFOX, MAGENTO, ANDROID, PHP (any 6)

20. Explain Types of Organizations related to Open Source. (any 3)

- Apache Software Foundation
- The Document Foundation
- The Eclipse Foundation
- Free Software Foundation
- Linux Foundation
- Open Course Ware Consortium
- Open-Source Initiative

21. Classify the E-Commerce Business Models.

- Business to Business (B2B)
- Business to Consumer (B2C)
- Business to Government (B2G)
- Consumer to Business (C2B)
- Consumer to Consumer (C2C)
- Consumer to Government (C2G)
- Government to Business (G2B)
- Government to Consumer (G2C)
- Government to Government (G2G)

22. Explain B2B module in E-Commerce.

In B2B E-Commerce, commercial transactions take place between different business organizations, through the Internet.

(eg.) A cycle company may buy tyres from another company for their cycles.

23. Explain briefly Anatomy of a credit card.

- Publisher
- Credit card number
- Name of the cardholder
- EMV chip
- RFID Symbol
- Expiration month and year
- Card brand logo
- Magnetic stripe
- Hologram
- Signature
- CVC / CVV

24. List any two E-Commerce Security Threats?

- Information leakage
- Tampering

25. List the various layers of EDI.

- Semantic layer
- Standard translation layer
- Transport layer
- Physical layer

26. What is EDI? Write its types.

The Electronic Data Interchange (EDI) is "Paperless Trade". The exchange of business documents between one trade partner and another electronically.

It's types:

- Direct EDI
- EDI via VAN
- EDI via FTP/VPN, SFTP, FTPS
- Web EDI
- Mobile EDI

27. Write a note on UN / EDIFACT.

United Nations / Electronic Data Interchange for Administration, Commerce and Transport (UN / EDIFACT) is an international EDI - standard developed under the supervision of the United Nations.

28. Write the output of the following program.

```
<?PHP
$a=5; $b=10;
$c=($a + $b) * $a;
echo $c;
?>
```

<u>Output</u> : 75

29. Write the output of the following program.

30. Write a PHP code to print 1 to 10

numbers in ascending order using

for loop.

Output:

 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:
 Output:

31. Write a PHP code to print 1 to 20 numbers in ascending order using while loopand do..while loop.

Code using while loop:

Code using while loop:

FIVE MARK QUESTIONS

1. Explain in detail about Production team roles and responsibilities.

Production team Roles and Responsibilities:

- <u>Production Manager</u>: The role of production manager is to define, and coordinate, the production of themultimedia project in time and with full quality.
- <u>Content Specialist</u>: Content specialist is responsible for performing all research activities concerned with the proposed application's content.
- <u>Script Writer:</u> The script writer visualizes the concepts
- <u>Text Editor</u>: The textshould always be structured and correct grammatically.
- <u>Multimedia Architect</u>: The multimedia architect integrates all the multimedia building blocks like graphics, text, audio, music, video, photos and animation
- <u>Computer Graphic Artist</u>: Computer Graphic Artist deals with the graphic elements of the programs like bullets buttons, pictures editing and etc.
- 2. Explain about different file formats in multimedia files.

Text File Formats : RTF, Plain Text
Image File Formats : BMP, JPEG, PNG

Digital Audio File Formats : WAV, MP3
Digital Video File Formats : AVI, MPEG

3. Write the steps to place the text in a frame.

To place text in a Frame,

- Click on one of a Frame tool from the Toolbox.
- Draw a frame with one of PageMaker's Frame tools. Make sure the object remains selected.
- Click on File -> Place. The Place dialog box will appear.
- Locate the document that contains the text you want to place, select it.
- Click on Open. Click inside the frame to place the text in it. The text will be placed in the frame

4. Write the steps to draw a star using polygon tool.

- Click on the Polygon tool from the toolbox. The cursor changes to a crosshair.
- Click and drag anywhere on the screen. As you drag, a Polygon appears.
- Release the mouse button when the Polygon is of the desired size.
- Choose Element > Polygon Settings.
- Type 5 in the Number of sides text box.
- Type 50% in Star inset textbox.
- Click Ok.

5. Explain the tools in PageMaker toolbox.

S.No.	Toolbox	Tool
1	K	Pointer Tool
2	T	Text Tool
3		Rectangle Tool
4	0	Ellipse Tool
5	0	Polygon Tool
6	8	Hand Tool
7	a	Zoom Tool

6. List the basic concepts of ER Model with suitable example.

- Entity or Entity type: An Entity can be anything a real-world object or animation which iseasily identifiable by anyone even by a common man. (Eg) In a company's database Employee, HR, Manager.
- Attribute: An attribute is the additional information about the entity and it will describe, quantify, qualify. And etc.
- Relationship: Relationship exists between two entities.

Three types of relationships are,

- 1. One-to-One relationship
- 2. One-to-Many relationship
- 3. Many-to-Many relationship

7. What are the data types in PHP? Explain.

8 data types in PHP:

- 1. Integer eg. \$age = 50
- 2. Float eg. \$x = 15.6
- 3. String eg. \$name = "Ram";
- 4. Boolean which contains the value True or False eg. \$ave = true
- 5. Array a single variable type which has multiple values

Eg.
$$y = array(12,33,87,33,10);$$

- 6. Object
- 7. Resource
- 8. NULL

8. Explain operators in PHP with examples

```
Arithmetic operators: +,-,*,/
Assignment operators: =,+=,-=,*=
Comparison operators: <,>,<=,>=,==
Increment/Decrement operators: ++, --
Logical operators: &&, ||,!
String operators: .(dot)
```

9. Explain Indexed array and Associative array in PHP.

(i) Indexed Arrays:

- An indexed array is an array that uses a numeric index to access its elements.
- The indexed is a number that starts at 0
 Eg: \$x = array(10, 10.5, 20, 20.5);
 \$x[2]; 2 is the index value.

(ii) Associative Arrays:

- An associative array is a data structure that stores a collection of keyvalue pairs.
- The keys are used to identify the values.

```
Eg. x = \text{array}(\text{"key1"} => \text{"value1"}, \text{"key2"} => \text{"value2"}, \text{"key3"} => \text{"value3"}); x[\text{key2}] key2 is the identify the value2.
```

10. Discuss in detail about switch statement with an example.

switch statement: This is a multiple branching statement where, based on a condition, the control is transferred to one of the many possible points.

SYNTAX:

```
case 1: echo "Monday";
break;
case 2: echo "Tuesday";
break;
case 3: echo "wednesday"
break;
default : echo"Sunday";
}
```

Output: Wednesday

11. What is loop? Explain 'for' loop with example.

Loop: It executes a set of instructions (a block of code) repeatedly for a certain number of times or until a certain condition is met.

For loop:

It is called as the entry-check loop.

It has three parts. Initialization, condition, increment/ decrement.

Syntax:

12. Explain 'foreach' loop with examples.

- The foreach loop is used to iterate over elements of an array.
- It is a simple and efficient way to iterate over arrays in PHP.

13. Explain the applications of computer network in Business, at home and mobile networks.

Networks in Business:

- Information sharing by large organizations to small organizations.
- Connects Branch Offices.
- Makes online money transactions easy.

Network at Home:

- Email, light, voice conversations, spam
- Sharing of resources.
- Information communication and information sharing

Mobile Networks:

- Information sharing on social media.
- You can use whatsapp, twitter, facebook.

14. Explain about Internet, Intranet and Extranet.

- Internet;
 - ✓ The Internet is a connection to the World Wide Web.
 - ✓ Technical tools are connected to each other.
 - ✓ Connection via wired and wireless media is being established.
- Intranet:

Intranet is a private network within an enterprise to share company data and computing resources between the employees.

- Extranet;
 - ✓ Connection of more than one intranet.
 - ✓ For information exchange with company and other branches will be attached.

15. Discuss about OSI model with its layers.

- P Physical Layer
 D Data Link Layer
 N Network Layer
 T Transport Layer
 S Session Layer
- P Presentation Layer A - Application Layer

16. Explain the types of network cables.

- Coaxial Cable
- Twisted Pair Cable
- Fiber Optic cable
- USB Cables
- Serial and Parallel
- Ethernet Cables

17. Describe the advantages and disadvantages of e-commerce?

E-commerce:

Selling goods and services through computer networks.

Advantages:

- Business can be done on all days of the week.
- E-commerce is easy, fast and cheap to sell.
- Can Sit on the customer seat and buy the products
- Can consult multiple networks before buying products.

Disadvantages:

- There will be a delay in getting the items to the customer.
- Check out the customer as things are online can't see and buy.
- Difficulty returning purchased items.

18. Explain any five E-Commerce revenue models.

- Auction website is a kind of website, that auctions items on the Internet and leaves some commission from the sale. e.g. https://www.ebay.com/
- Banner advertisement website displays advertisements of other companies in itswebsites and thereby earns revenue.
- Digital publishing sites effectively host the e-books or magazines on the web. They make profits in a number of ways such as advertising, selling etc., https://wordpress.org/
- Name-your-own-price website are just like normal retail sites.
 E.g: https://in.hotels.com/

19. How would you differentiate a traditional commerce and E-Commerce?

Traditional commerce	E-Commerce
Traditional commerce is buying or selling	Traditional commerce is buying or selling
of products and services physically.	of products and services physically
Products can be inspected physically	Products can't be inspected physically
before purchase.	before purchase.
Resource focus Supply side	Resource focus Demand side.
Most goods are delivered instantly	It takes time to transport goods.
Marketing is one way marketing.	One-to-one marketing.

20. Credit card, debit card, and savings card Compare and contrast.

Credit card:

- A credit card can be used for retail transactions.
- Customers can buy goods without paying in the account.
- Then the customer pays the loan with interest.

Debit card:

- Buy with money in the customer's bank account allow.
- Purchased amount will be deducted from customer account.
- No need to pay any interest.

Savings card:

- Prepaid value card.
- The customer can use the card up to the value of the card.
- Can only be used for specific branches.
